

## **Emery Federal Credit Union Selects Open Solutions' TCCUS-sme** **May 17, 2006**

**GLASTONBURY, Conn.**, – Emery Federal Credit Union has recently selected Open Solutions Inc.'s® (NASDAQ: OPEN) *The Complete Credit Union Solution® Standard Market Edition (TCCUS-sme)* a relational core data processing platform for credit unions, to address its enterprise-wide data processing needs. Open Solutions is a provider of integrated relational technologies for banks and credit unions throughout the United States and Canada.

Emery Federal Credit Union is located in Cincinnati, Ohio with over \$94 Million in assets and 12,000 members. Credit union CEO Joseph Lind indicated, "The decision to choose the TCCUS-SME system over the other five vendors came down to the software and the support provided by Open Solutions. Our Management Team felt the TCCUS-SME system was the best to help us deliver the products and services our members want and need--a true partner to help grow our Credit Union now and into the future."

The credit union will be migrating to TCCUS-sme in October, 2006 and is currently on the CyberBranch platform.

The Complete Credit Union Solution was designed to be an open architecture application, creating the flexibility necessary for running a service-oriented financial institution. It provides credit unions with a fully featured strategic product platform, integrating core data processing with customer-centric applications such as Internet banking, business intelligence, financial accounting, credit card processing, imaging, and interactive voice response solutions. The recently announced *Standard Market Edition* is a specific implementation for credit unions seeking significant base functionality without certain business and real-estate sophistication. It is a proven right-sized solution for credit unions.
